Prestigious Awards

Our International Awards and Accolades Recognize Our Journey of Excellence

The awards bestowed upon us strengthen our determination to offer high-quality service to the people who matter the most – our clients.

Featured in Global Press Reaffirming Our Commitment to Excellence

Hidden Brains has been featured in notable IT magazines highlighting desire to innovate beyond excellence, as well as exceptional commitment to quality and work.

Ensure best-in-class team performance with latest certifications to enhance project delivery and quality.

We have a passionate team who constantly keep them engaged by learning new tools and certifications which can contribute to the success of the company and help offer better Customer Experience.

Our Vision

Our VISION is to be a global leader in IT solutions and services with impetus on innovation, excellence, and implementation of ethical Business Strategies - with the ultimate aim of giving back to the society.

Our Mission

“Our MISSION is to CREATE innovative products and DELIVER excellence in services with constant emphasis on engineering, process quality and customer satisfaction - We ADD value to your business.”

Quality Policy

“We DELIVER effective quality solutions and services to our clients - meeting project requirements and achieving continuous excellence in all our products and services – guided by our defined global standards in quality management.”

Delivering excellence based on values of trust and ethics.

Offering a complete spectrum of services

Hidden Brains offers technology services to address business challenges. Our proven domain experience, technical expertise and in-depth knowledge of emerging technologies trends empowers us to build solutions that go beyond meeting client's expectations.

Hire Dedicated Developers

Hidden Brains offers the option to hire a dedicated development team to bridge the IT talent demand and supply gap through a team of seasoned & skilled professionals with domain expertise.

- ▶ Managed Team
- ▶ Hybrid Model

Web Development

We have built secure web application development solutions that align with customer's business strategies and requirements.

- ▶ MEAN
- ▶ LAMP
- ▶ Open Source
- ▶ Java

Mobile App Development

We harness the latest technologies, tools, frameworks and SDKs to develop custom mobile apps for iPhone, iPad, and Android.

- ▶ iOS
- ▶ Android
- ▶ React Native
- ▶ Xamarin
- ▶ PWA
- ▶ Flutter

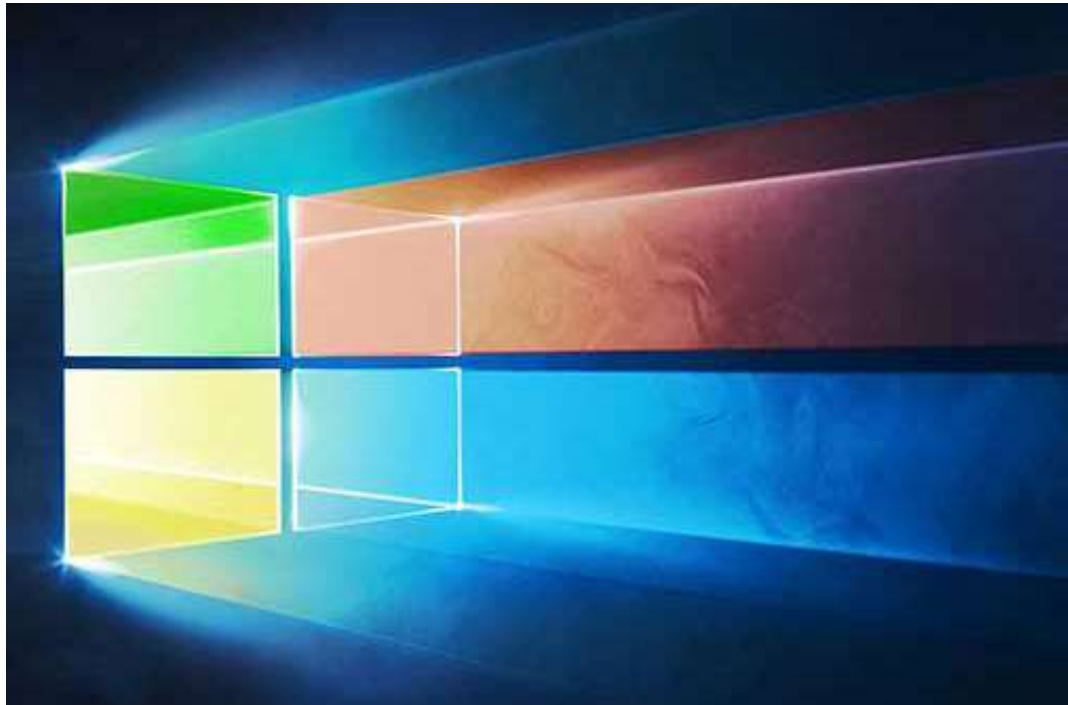

Front End Development

Hidden Brains provides cutting-edge front-end development of complex, innovative, dynamic and responsive websites.

- ▶ AngularJS
- ▶ VueJS
- ▶ ReactJS
- ▶ Knockout JS

Microsoft Development

We provide intelligent solutions for business through Microsoft technologies. Our consulting services will provide an edge.

- ▶ ASP.Net Core
- ▶ C#
- ▶ ASP.Net
- ▶ MVC

Product Prototyping

Hidden Brains expertise in frontend development ensures quick time to market and user-driven outcomes.

- ▶ Static Prototype
- ▶ Proof of Concept
- ▶ Functional Prototype

Cloud & Devops

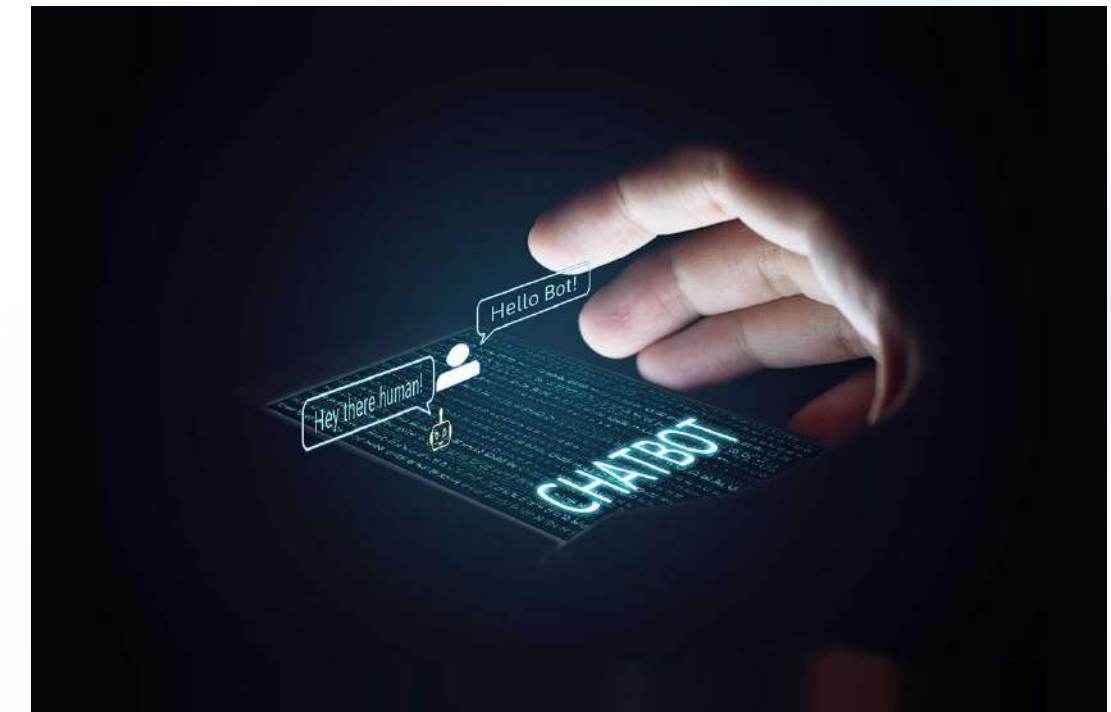

Hidden Brains delivers cloud and DevOps solutions to innovate rapidly while maintaining regular releases & continuous integration for quick time-to-market.

- ▶ AWS
- ▶ Google Cloud
- ▶ Microsoft Azure
- ▶ Hybrid Cloud

Trending Technologies Services

Hidden Brains offers world-class services on emerging technologies ranging from ChatBot, AI / ML, IOT to BlockChain. Our services can shape transformation and help businesses stay agile, elevating them to the path of success.

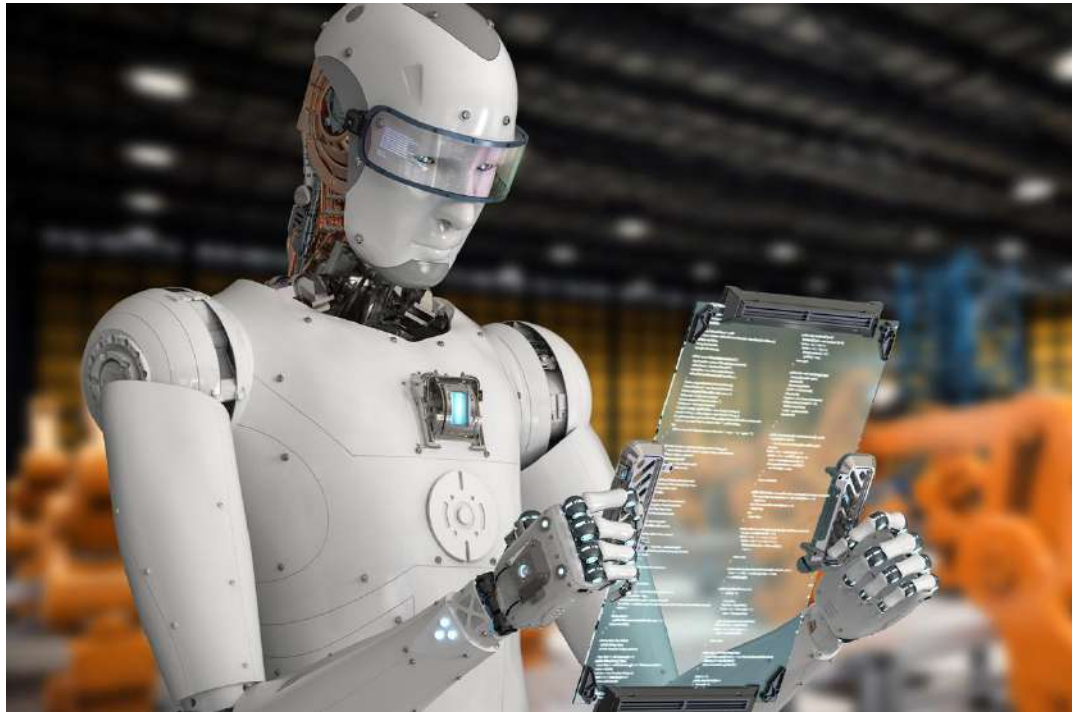

Chatbot Development

Whether you are looking to build your own chatbots, conversation bots, IVR bots, online chat bots, text bots or messaging bots, we provide Chatbot development services tailored to meet your needs.

- ▶ Microsoft Bot
- ▶ IBM Watson
- ▶ Facebook bot
- ▶ Dialogflow
- ▶ Amazon Alexa
- ▶ Chatfuel

Artificial Intelligence

With a proficiency in AI technology, we help businesses adapt to the intelligent solution by providing AI consulting, deployment, and support.

- ▶ Tensorflow ONNX
- ▶ Pytorch
- ▶ Caffe
- ▶ Keras

Internet of Things

Hidden Brains specialises in Microsoft development and consulting to drive innovation and growth in the digital era.

- ▶ IBM Watson IoT
- ▶ AWS IoT Core
- ▶ Google Cloud IoT
- ▶ ThingWorx
- ▶ GE Predix
- ▶ Losant

Blockchain Development

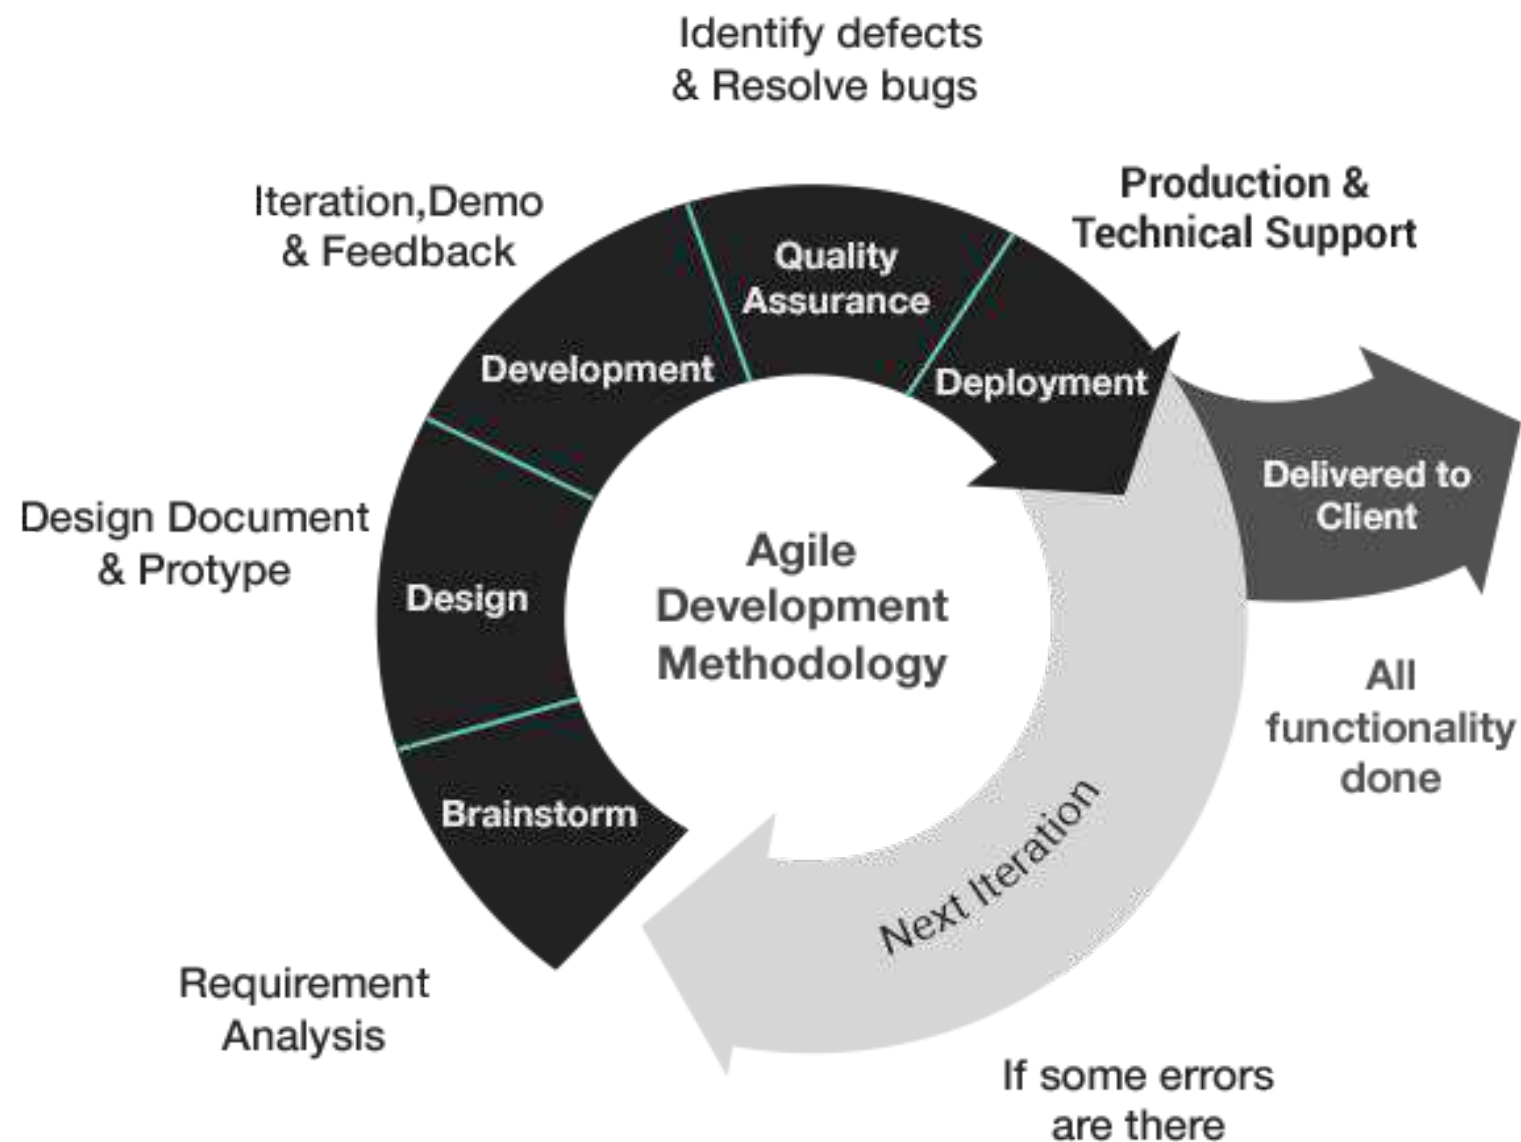

Helping clients adopt the Blockchain technology by addressing the challenges of security, process and technology

- ▶ Consulting
- ▶ Smart Contract
- ▶ Crypto Exchange
- ▶ Decentralized
- ▶ Hyperledger

Agile methodology introduces new changes with continuous communication and collaboration with short-term software development cycles called iterations. This method is best to accommodate change and the need to produce software faster.

Agile

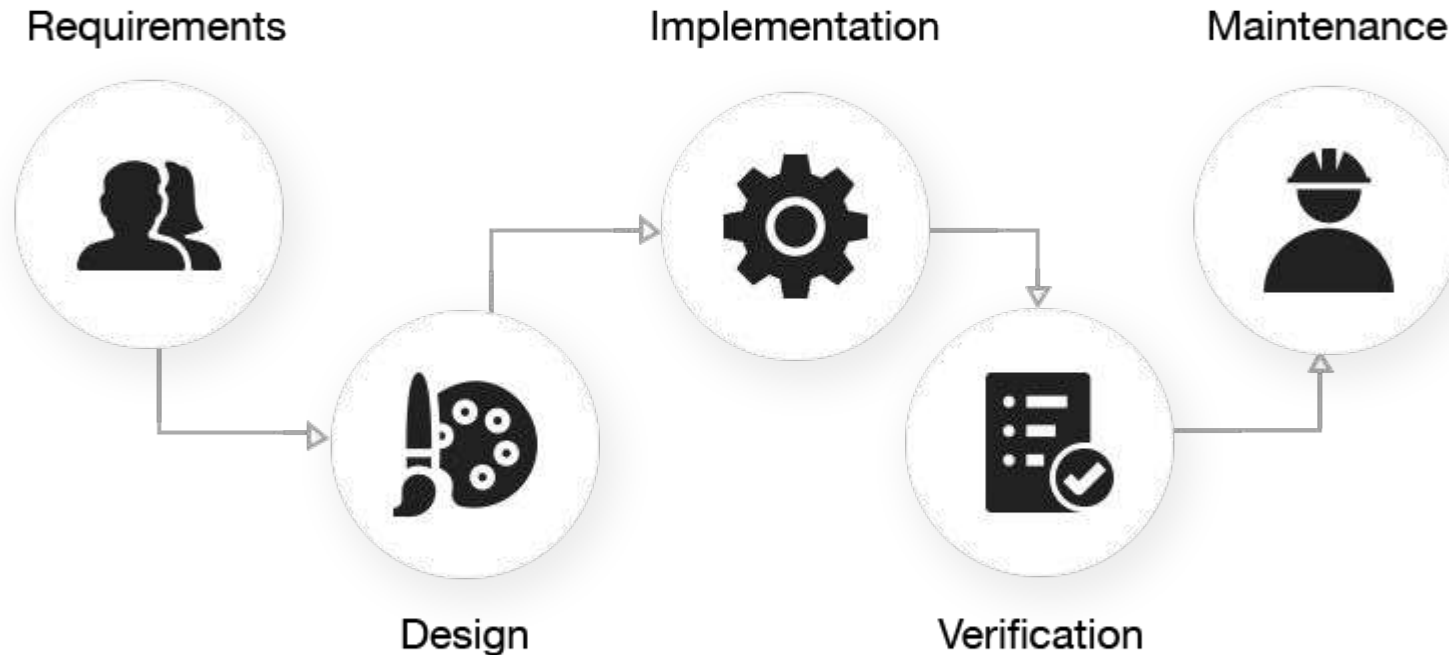

- ▶ Incremental and iterative development minimizing risk
- ▶ Focuses on people over processes
- ▶ Divide tasks into smaller modules called sprints
- ▶ Predetermine scope of work and assign dedicated people to teams
- ▶ Bifurcate work till the final release

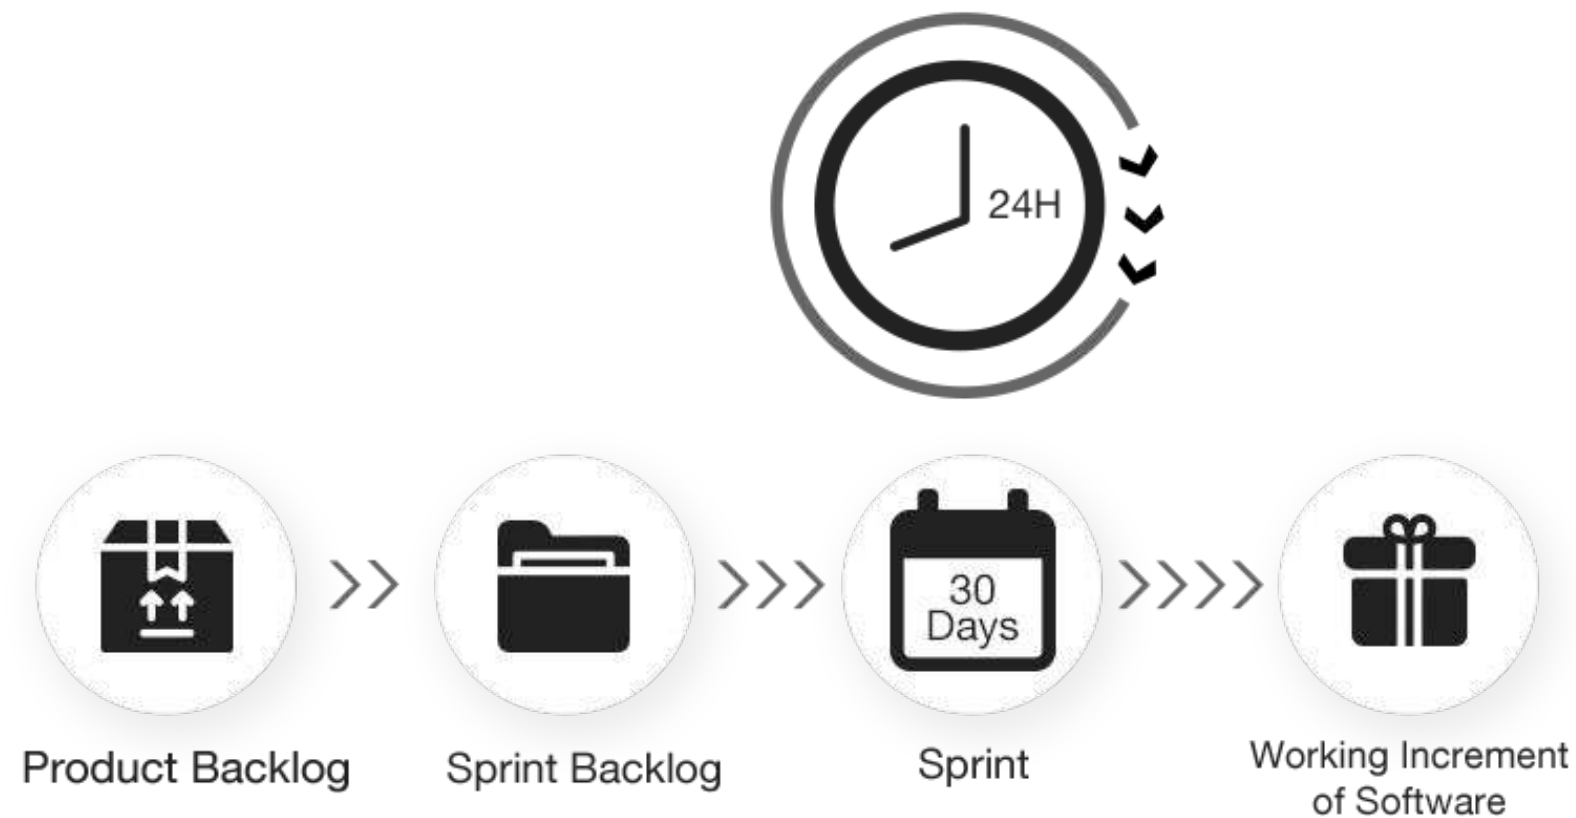

Linear in nature with projects progressing in stages, Waterfall methodology depends on completion of one stage precedes the other. Under this model determine, we determine and analyze requirements, design, implement, test, deploy and maintain the project.

Waterfall

- ▶ Suitable for large teams with a very clear understanding of the project's scope
- ▶ Defined scope, objective and expectations before the start of the development process
- ▶ Most effective method for small projects in cases where the requirements are well defined

Scrum

Scrum development kicks off with a brief planning for each sprint, daily scrum meetings to highlight project progress, and a final review. It is ideal for managing projects which does not have well defined requirements and feedback from the client.

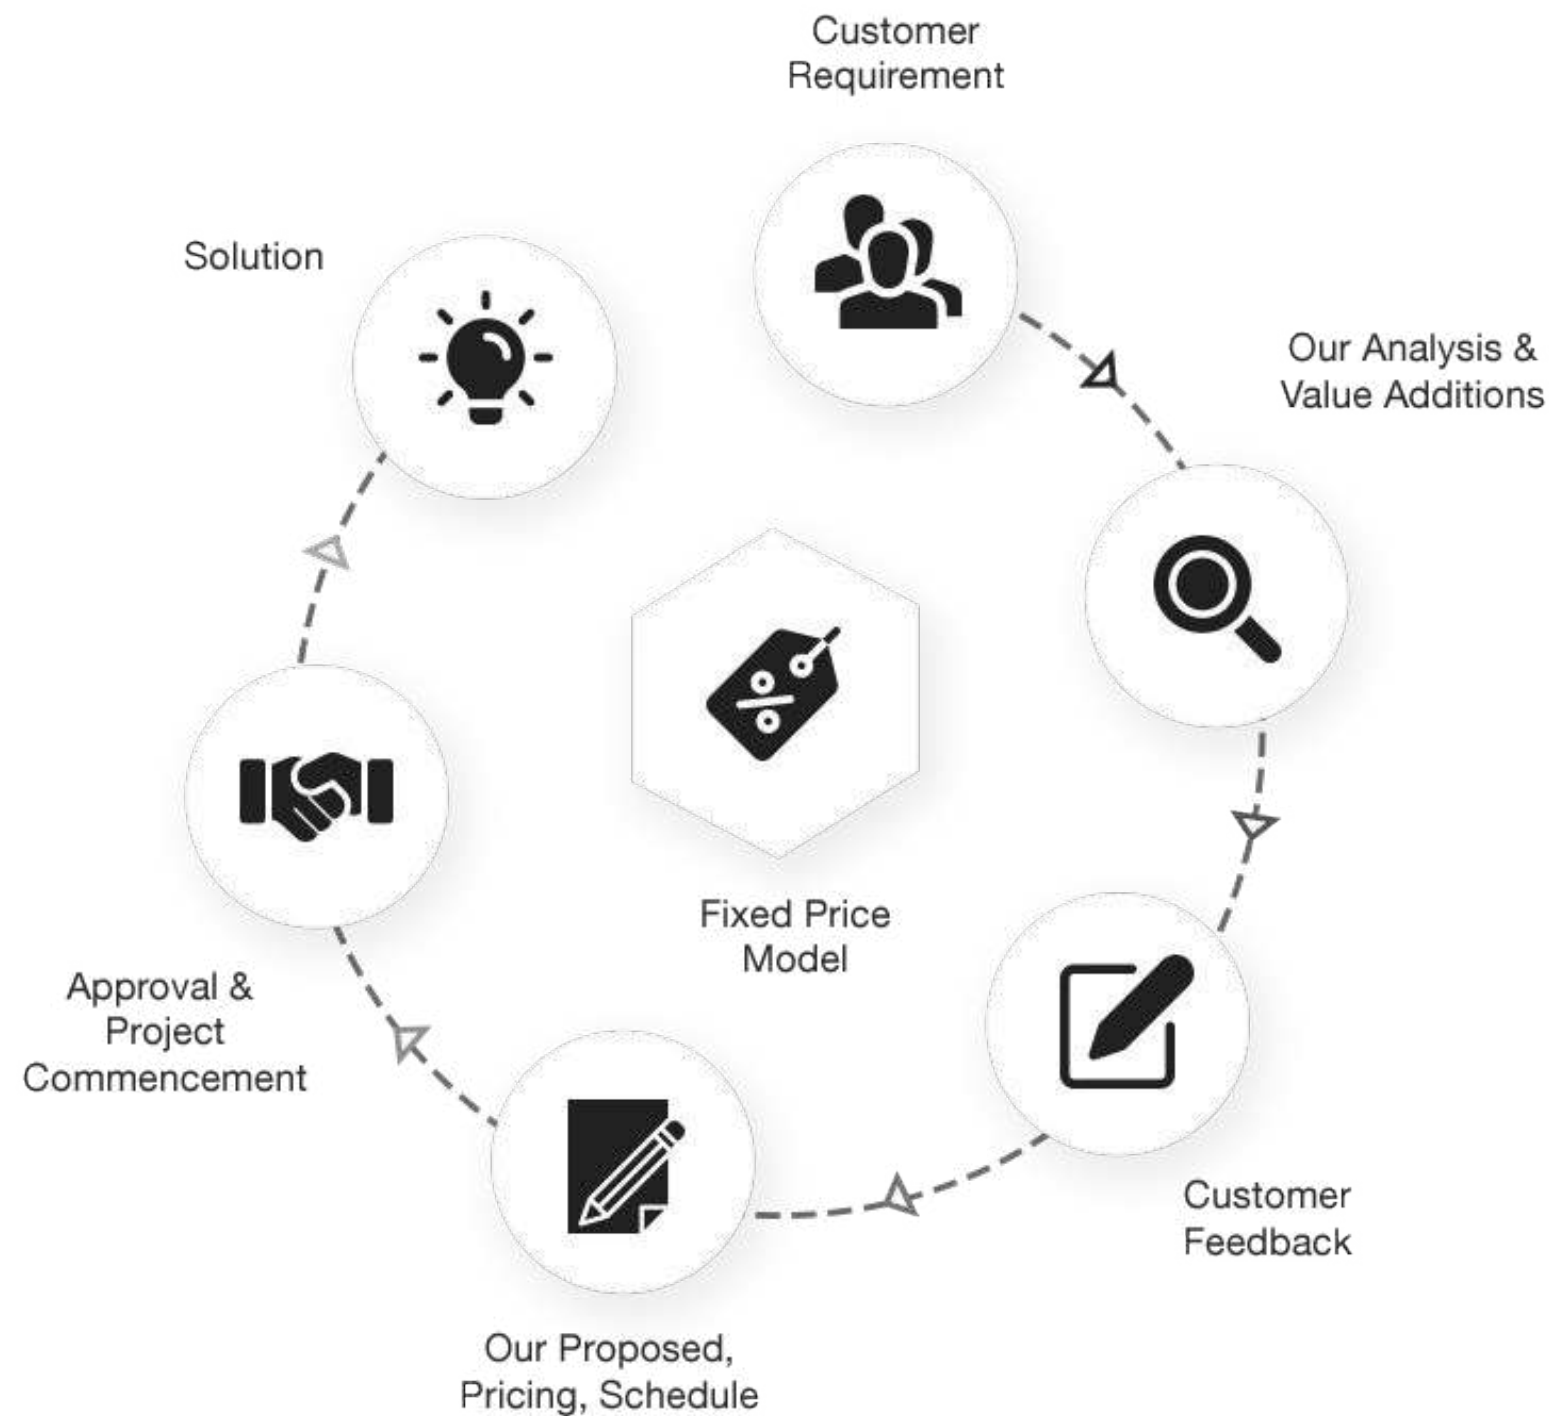

Scrum

- ▶ Ideal for projects with rapidly changing, dynamic or highly evolving requirements
- ▶ Development process moves in a series of sprints or iterations
- ▶ Flexibility to adapt to emerging business realities
- ▶ Fast feedback cycle to stay focused and discover problems

Our Fixed price model is the best choice for projects with well-defined scope and requirements. In this model, all project requirements are predefined right from the beginning of the development process, along with core objectives and deliverables for the project.

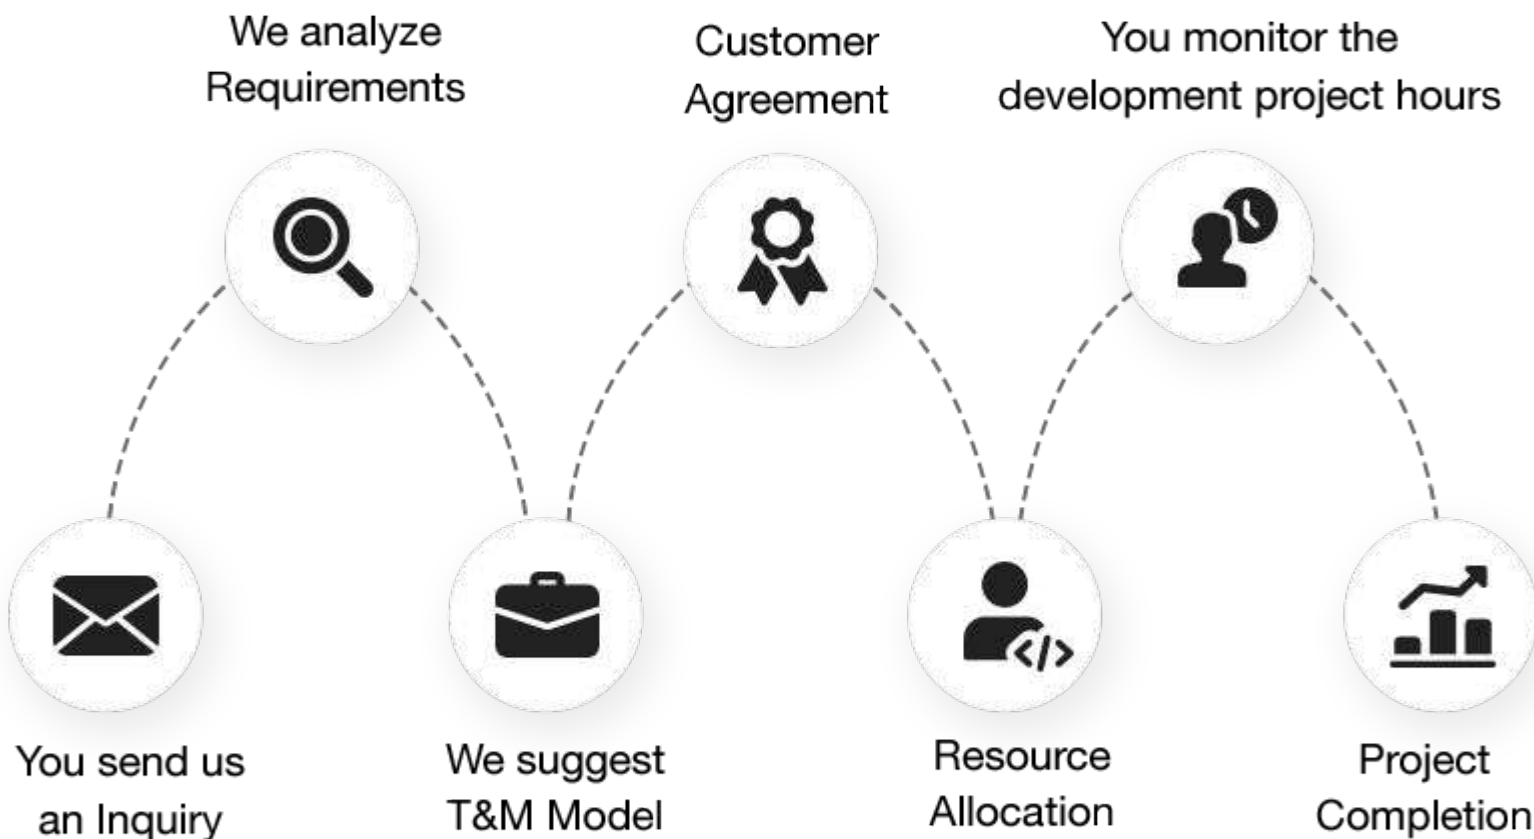

Fixed Price

- ▶ The fixed model has exact budget defined in advance
- ▶ Billing is based on milestones completed
- ▶ Change in scope needs client approval, ensuring budget never exceeds

Hidden Brains' Time & Material model offers the flexibility to modify project specifications, explore new activity and make changes to resources depending upon the evolving project lifecycle.

Time & Material

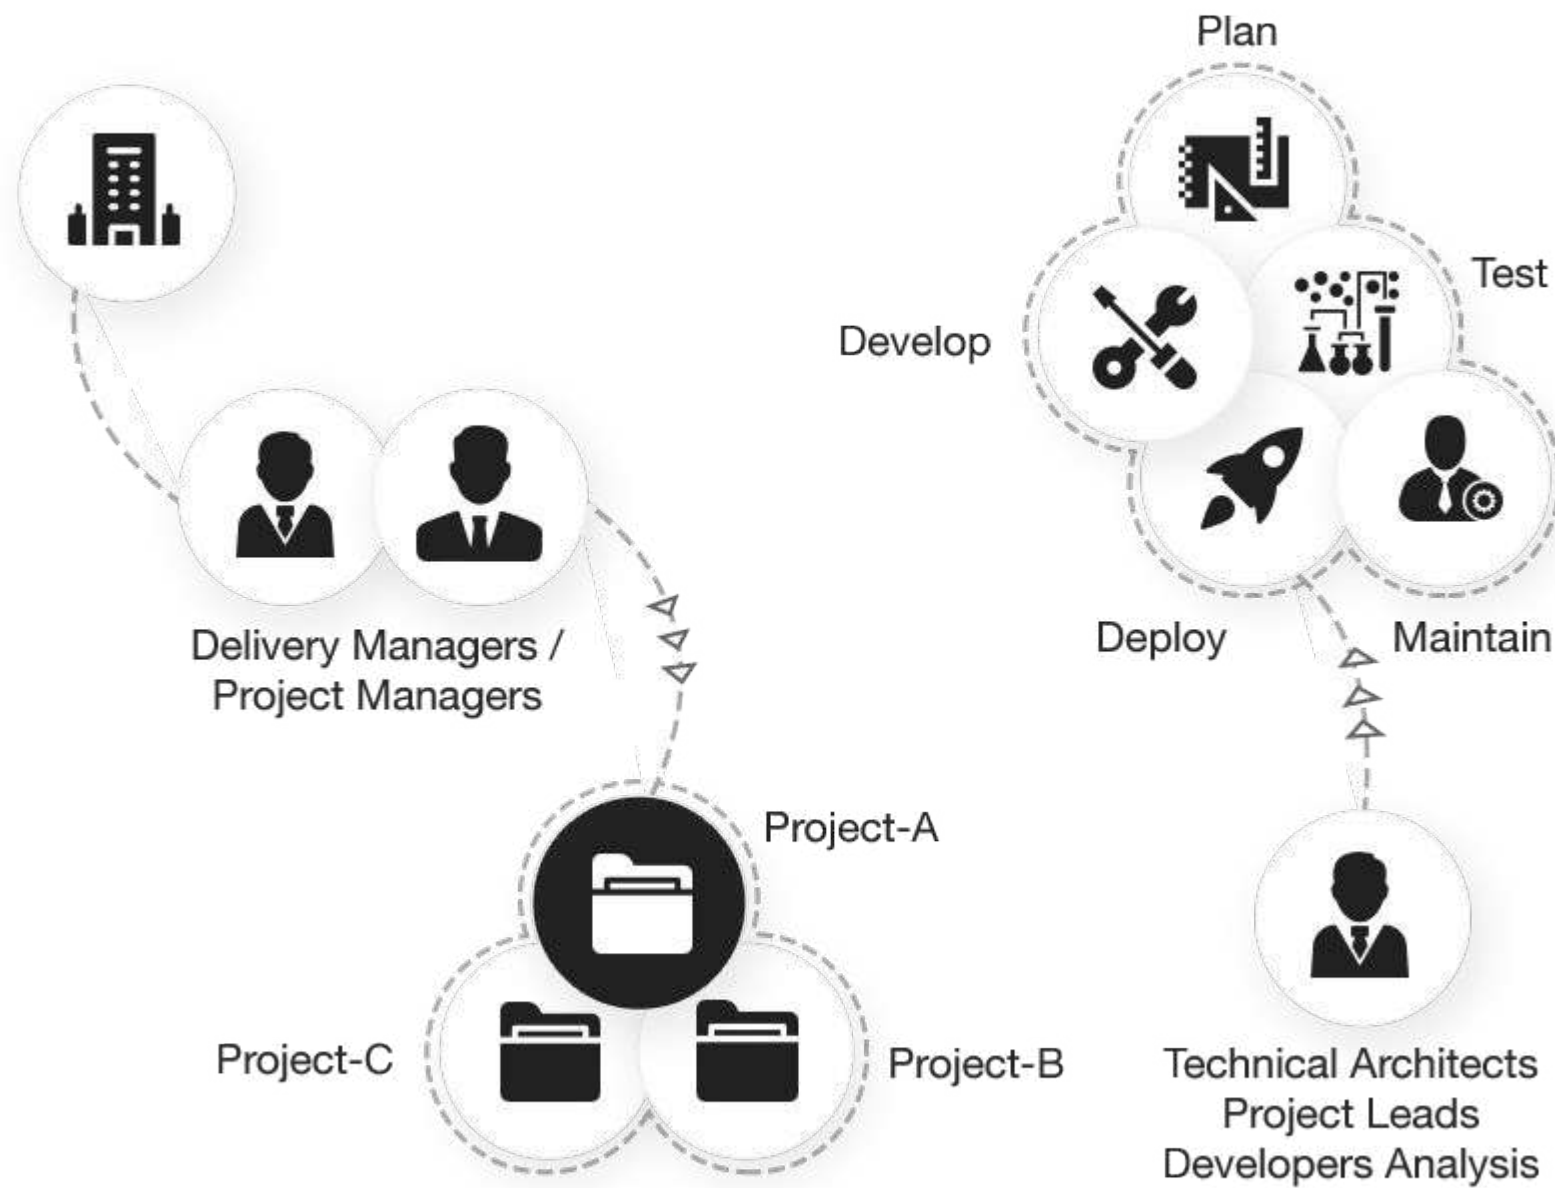

- ▶ Best option when the project scope is constantly changing
- ▶ Option for client to make hourly, daily, weekly or monthly payment
- ▶ Flexible model, allowing client to experiment with new activity and requirements

Dedicated model works best for projects which require quick scaling or require expert developers to work on a long-term basis. This type of model is perfect to meet tight project deadlines, sudden team expansion or hiring a developer for emerging technologies.

Dedicated Hiring

- ▶ Best model for clients with in-house staff to manage the projects
- ▶ Get dedicated developers assigned to your project
- ▶ Billing on fixed or hourly basis

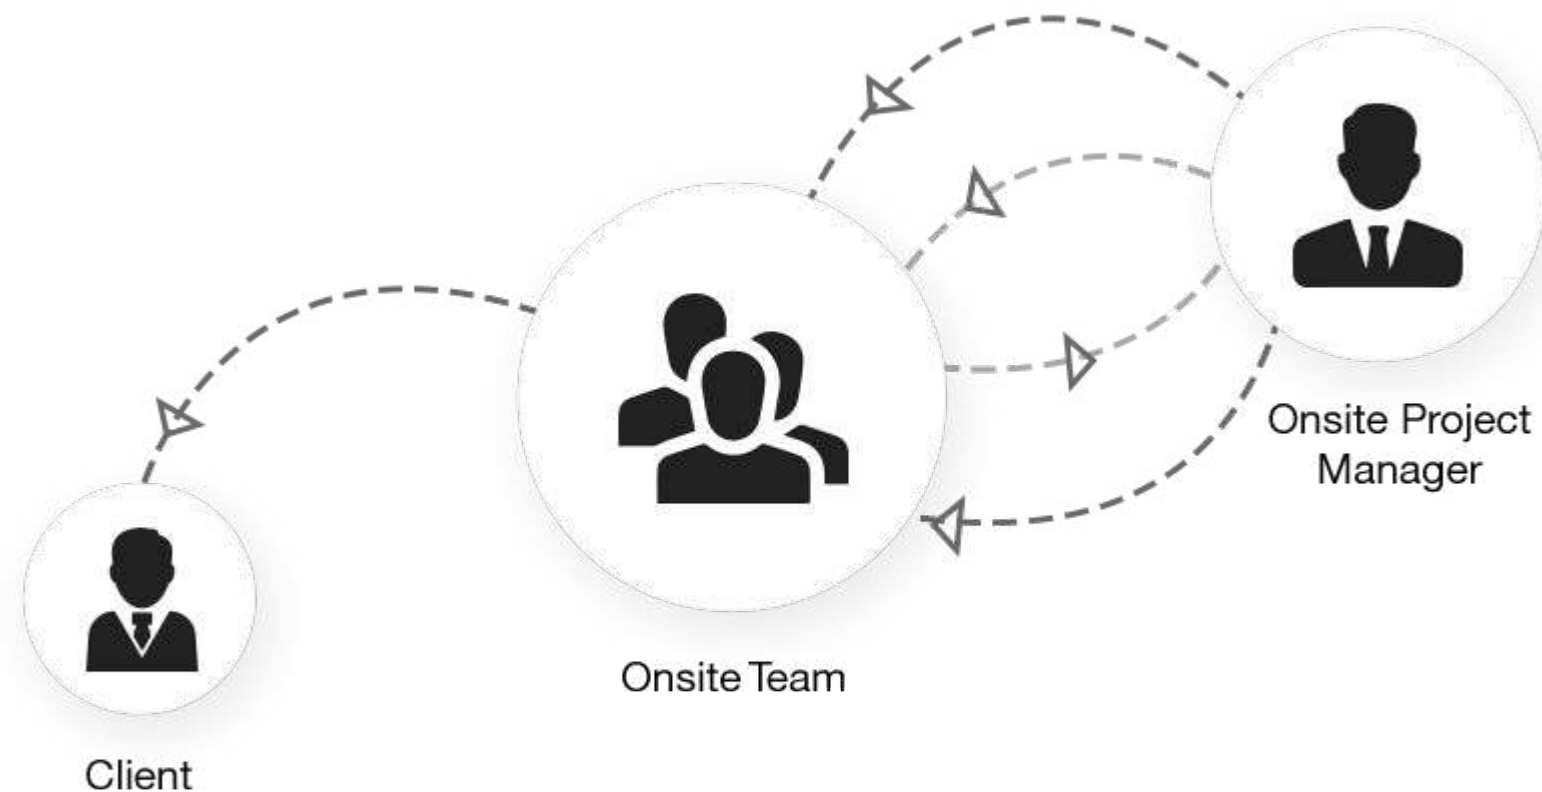

In this delivery model, the project deliverable and milestones are accomplished at our offshore development center. Hidden Brains Offshore delivery models allow excellent synchronization between our teams and your in-house team.

Offshore Delivery Model

- ▶ Significant reduction of project's overall cost
- ▶ High quality work from experienced, talented offshore resources
- ▶ No overhead costs as client doesn't have to expand infrastructure to scale up

Under the Onsite Delivery Model, we place skilled developers at the client's site, ensuring continuous interaction with the client's team for the stipulated contract period.

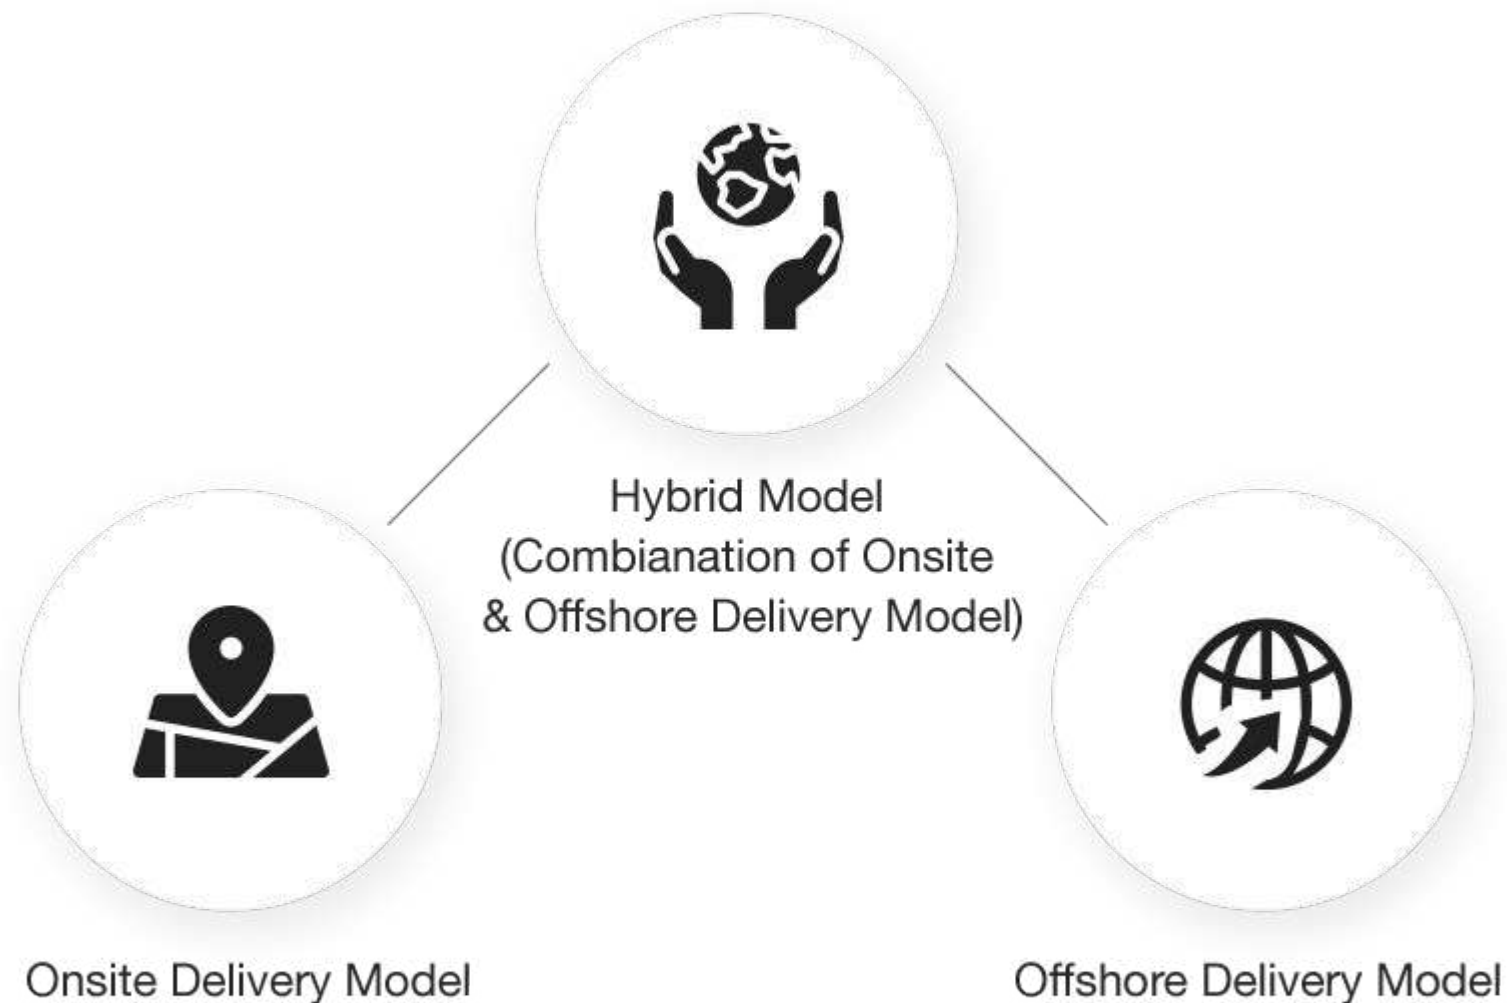

Onsite Delivery Model

- ▶ Face to face interaction with the client enables clear understanding of project results and expectations
- ▶ Eliminates miscommunication as teams are working in close proximity
- ▶ Ensures quick time-to market

Hybrid Delivery Model is the amalgamation of onsite and offsite models, providing the benefits of optimum cost and fast turnaround time.

Hybrid Delivery Model

- ▶ Continuous work cycle making optimum use of resource
- ▶ Access best technology, skilled manpower and infrastructure of offshore development centers
- ▶ Significant cost savings resulting from major work being outsourced to the offshore center

Security & IP

Hidden Brains pays due diligence to security and intellectual property protection. We value customer's IP rights and data by securing business processes in the best possible manner. With implementation of best practices, we safeguard your software assets and protect legitimate interests.
